FM GROUP PROJECT SPRINT 1

1) What functionality does the system have at the end of this sprint?

- Admins can login to the system with account.
- Admins can add new sections to the site.
- Admins make new entries in news section. Admins also edit or delete news that needs correction or are false.
- Users can login to the system with account.
- Users can read news.

2) List the user stories that you successfully implemented during this sprint.

- 1- As a football critic I want reliable and updated news source for my work.
- 2- As a football team supporter I want to read news so that i always stay updated about my team.
- 3- As a gamer and football lover i want to get mail from web site about game result.
- 4- As news admin i make new entries. I also edit or delete news that needs correction or are false.

3) Did you end up making any changes to any of these user stories? Did you break down further any the user stories?

- No we made no changes to the user stories. But we can change some user stories in the other sprint by making reviews on our "Blog".

4) Did you identify any new user stories during this sprint and, if so, did you add them to the product backlog or decide to implement them right away? Explain

- According to the first sprint report, we have enough user stories. So there was no need to add a new story.

5) Lessons Learnt

- We Learnt how hard is to make a reliable source of news at any point and we make good use of each others strenghts and put our effort in it. Also we understood importance of team play.

6) Provide an Updated Numbered List of All User Stories Yet to Be Implemented; Indicate Pre- and Pos-Conditions

User Story 1:

As a football team supporter i want to discuss about my team.

Pre-condition:

User must login on website. And press "BLOG" button.

Post-condition:

User can discuss other people.

User Story 2:

As a football fanatic i want to defend my team against other teams and their supporters.

Pre-condition:

User must login on website. And press "BLOG" button.

Post-condition:

User can defend him/her team.

User Story 3:

As forum admin i check if people having their discussion in peace. I warn or ban people whos being too oppressive and i delete or edit topics.

Pre-condition:

User must login as admin. And press "BLOG" button.

Post-condition:

Admin can check peoples conversations. And warn or ban.

7) Given the current functionality of the system and taking into account the pre- and post-conditions, identify a subset of user stories to be implemented during the next sprint.

1- As a football team supporter i want to discuss about my team.

2- As a football fanatic i want to defend my team against other teams and their supporters.

3- As a gamer and football lover i want to get mail from web site about game result.

4- As forum admin i check if people having their discussion in peace. I warn or ban people whos being too oprressive and i delete or edit topics.

5- As a football lover i want to play game and discuss about it.

6- As a football fanatic i want to defend my team against other teams and their supporters.
