FM GROUP PROJECT SPRINT 1

1) What functionality does the system have at the end of this sprint?

- Admins can login to the system with account.
- Admins make new entries in news section. Admins also edit or delete news that needs correction or are false.
- Admins can add new sections to the site.
- Admins have control over forum section. They can ban users or delete posts from forum section.
- Users can login to the system with account.
- Users can read news.
- Users can use forum section.

2) List the user stories that you successfully implemented during this sprint.

- 1- As a football team supporter i want to discuss about my team.
- 2- As a football fanatic i want to defend my team against other teams and their supporters.
- 3- As a football critic i want to get mail from web site about timely.
- 4- As forum admin i check if people having their discussion in peace. I warn or ban people whos being too oppressive and i delete or edit topics.

5- As site admin it is my job to be sure people have their entertainment, be able to get right news and discuss peacefully. So i login and check others admins works and judge if their decisions are true.

3) Did you end up making any changes to any of these user stories? Did you break down further any the user stories?

- We haven't made any changes to our user stories.

4) Did you identify any new user stories during this sprint and, if so, did you add them to the product backlog or decide to implement them right away? Explain

- According to the sprint reports, we have enough user stories. So there was no need to add a new story.

5) Lesson learnt:

- We learnt how to improve ourselves even further and extend our imagination into new level. We learnt how teamwork makes everything easier and bearable.

6) Provide an Updated Numbered List of All User Stories Yet to Be Implemented; Indicate Pre- and Pos-Conditions:

User Story 1:

As site admin it is my job to be sure people have their entertainment, be able to get right news and discuss peacefully. So i login and check others admins works and judge if their decisions are true.
